It is with great pleasure that we recommend Abheek Bose(Co-founder, Robots Alive Consulting Pvt Ltd).

Abheek worked with us for a duration of 7 months (January 2016 to July 2016) as a consultant to complete the first working prototype of a key component (digital scanner) required by our product. He worked with us on conceptualization, design and implementation of the first prototype. Abheek demonstrated tremendous thought leadership while working on this project. We could complete the project on time because of his strong technical and planning skills.

Abheek is a dependable individual who is hands-on, smart and aware of the industry and ecosystem. He will be an asset to any organization and we would be happy to give him our wholehearted endorsement.

Sincerely,

For SigTuple Technologies Pvt Ltd

Rohit Kumar Pandey
